

XT7 - 91" GALV LOWRIDER BP DUMP TRAILER

**IT'S HAUL
OR NOTHING.**

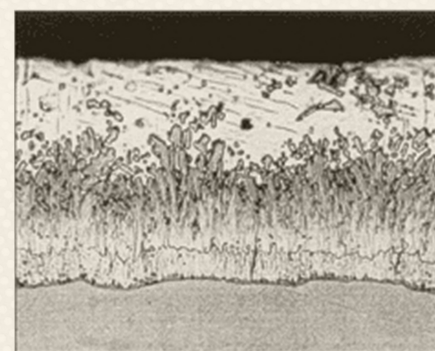

HOT-DIP GALVANIZED. BUILT TO OUTLAST THE ELEMENTS.

The XT7 - 91" GALV LowRider Dump Trailer is built for environments where corrosion destroys ordinary trailers. From salt air along the coast to road salt in winter, the entire frame is protected through a full hot-dip galvanizing process that shields every weld, seam, and edge.

During galvanizing, the trailer frame is fully submerged in molten zinc at over 840°F, creating bonded protective layers that become part of the steel itself. Unlike paint or powder coat, this protection doesn't chip away — it's built into the structure for long-term resistance to rust and corrosion.
